

**TERRA MINI-JET brings light into the dark –
HDPE Pipe Ø 63 mm (2.48") laid for 220 Volt power line**

City:	Tauberbischofsheim-Königshofen / Germany
Contractor:	M/s Elan-Müssig GmbH / 97900 Kulsheim / Germany
Length:	15 m
New Pipe:	HDPE pipe OD 63 mm (2.48")
Machine:	TERRA MINI-JET
Drilling Fluid:	Special Bentonite MAX BORE HDD
Underground:	clay

The TERRA MINI-JET is lifted into the working pit with a mini excavator.

The TERRA MINI-JET is positioned in the working pit, ready for the pilot bore.

The complete TERRA MINI-JET system can be transported on a small trailer.

Pic left:

The drill head reaches the arrival pit after 15 meters and 25 minutes right on target. The power main line can be seen.

Pic right:

After another 30 minutes the backreamer \varnothing 115 mm (4.5") reaches the working pit with the HDPE Pipe OD 63 mm (2.48").
