

House connections with T 055 SK from 0.90 m (3 ft) long pits

In the Netherlands most of the sidewalk flagstones are 0.30 x 0.30 m (1 ft x 1 ft). The TERRA-HAMMER T 055 SK is only 0.90 m (3 ft) long. Therefore only 3 sidewalk flagstones must be removed for the pit for house connections. This launching pit with 0.90 m x 0.30 m (3 ft x 1 ft) is large enough for this TERRA-HAMMER. The depth of the launching pit is 0.55 m (22").

The TERRA-HAMMER T 055 SK is very powerful but operates at a very low recoil. It is very easy to operate. This allows 5-10 house connections per day depending on the ground conditions and the piercing lengths.

The launching pit is prepared.

The TERRA-HAMMER T 055 SK penetrates into the ground.
